

mSAP™

mSAP™

mSAP™ connects seamlessly to your SAP and mySAP system to provide mobile access to financial systems, human resource, operations, integrated logistics management, remote monitoring and network management, vehicles and assets location and track and trace systems. It enables the mobile workforce (including sales, technical, field service, maintenance team, management) to read information, submit or receive updates, create tasks, monitor assets remotely, send and receive alerts and coded reports via multiple mobile devices including mobile phones and PDAs

Key Features

Enables key financial, strategic and competitive summaries, reports and analysis to be delivered as scheduled to mobile phones/PDAs or to email/fax on-demand.

Enables key marketing and sales processes from mobile marketing to lead generation, order entry to payment processing to be initiated from the mobile phone/PDA with seamless connectivity to backend processes. Tracks and traces orders at all points along order management, manufacturing, distribution, fulfillment, delivery and proactively notifies customers of changes that affect delivery via mobile phone/PDA.

Enables credit checks and provide information about customer contracts, rebates, billing status and accounts via mobile phone/PDA.

Enables customers to get timely response to service requests, to receive catalogues and sales quotations by email/fax, to check prices, enter orders and book delivery date/time using a mobile phone/PDA.
