

AirPIMS™

Personal Information Management System

AirPIMS™

AirPIMS™ is a web and mobile PIMS(Personal Information Management Service) offering hassle-free time management, a productivity tool essential to every mobile user. You can synchronize, request, retrieve and update email, contacts, calendar and task wirelessly from the network server with convenience and reliability using any wireless device. This "thin client" product means that you are no longer limited by storage capacity or other limiting feature of any™particular device. AirPIMS enables true mobility and hassle free retrieval of important and timely information.

AirPIMS™ consists of:

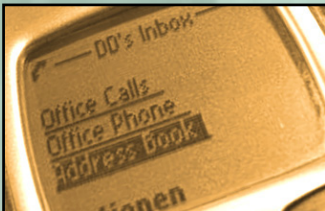

Email

Retrieve emails from any email accounts using WEB, or WAP-enabled hand phones or PDAs or any web-browser. The Email Gateway is a convenient utility that allows users to Read, Compose, Reply, Send, Delete and Forward emails at anytime no matter where they are. The Email Gateway currently supports SMTP for sending, and POP3 for retrieving emails from the users chosen mailbox.

Calendar

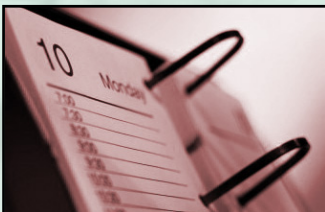

The Calendar is a tireless virtual secretary that works 24-hours a day and seven days a week. Schedule, plan and organise functions, appointments, meetings and special events like birthdays and anniversaries. It also allows a user to Insert, Edit and Delete any appointment and receive Alerts through emails or SMS using a WEB and/or WAP device and View daily, weekly, monthly, quarterly or even yearly schedules.

Contact

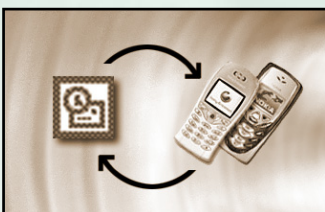

Store all personal and business contacts and create your own easily-accessible personal directory list. Users can also share their list of contacts with other PIMS users. The Contacts module is a wireless phone book with massive storage capacity. The PIMS system administrator has privileges to control the storage capacity for each user. This application allows the users to retrieve, create, edit, delete, and search for contact fields. Direct dialing via WTAI when using WAP mobile phone is also possible.

Share functionality: If a user knows the MSISDN number of another PIMS user he can share his contacts list with that PIMS user, Who can view these contacts under the shared folder. A user can reject or add the contact information to their personal contact list.

Tasks

The task product is a useful web and mobile reminder service. Insert task and you can be alerted via email or SMS. It product provides compatible functionality and features to Microsoft Outlook®'s To Do list with added features like WAP wireless access and SMS alerts to the mobile phone.

Synchronization

From the desktop, the user can synchronize his contacts, tasks and appointments with his Microsoft Outlook® Address Book, To Do list and Calendar by activating our AirSync plug-in. The AirSync plug-in is a one-step simple programme downloadable from the AirGateway web site at <http://www.airgateway.com>.
